

## INTERNET SOLUTION

Here is a simple solution to our poor internet in our Island in the Hills community. I purchased an AT&T wireless internet modem through my Cell service account. It is a 6" X 6" unit that you just plug in to an electrical outlet and BAM, internet. I purchase a screw on antenna to help with the signal strength.

My wife Ann works from home and loves the upload and download speeds. We can also watch Netflix, Amazon Prime, Disney channel etc. with no interruptions. In conjunction with our Direct TV we are thrilled.

This unit costs \$199.00 plus tax and \$70.00 per month with 100 GB's of usage. We were paying over \$100.00 for horrible Hughes Net service that only gave us 25 GB's per month.

I purchased the unit at the Three Rivers AT&T store. If you are a Verizon customer, check to see if they offer any similar product.

Any Questions please call Brian Lietz at 815-210-4439.
