Per Jeff Wenzel discussion with Lee Zimmerman on 9-16-20:

- 1. Septic drain field must be at least 100 ft. from water's edge in a Condominium, and only 50 ft. from a "metes and bounds" property like TRACT 46. (The 15 wooded acres just SOUTH of our Condo.)
- 2. Drinking water well must be 10 ft. from water's edge AND be a minimum of **68 ft.** deep
- 3. Drinking well must be 50 ft. (new law 75 ft.) from septic system
